

# PrivateLAN

## CityBridge VLAN

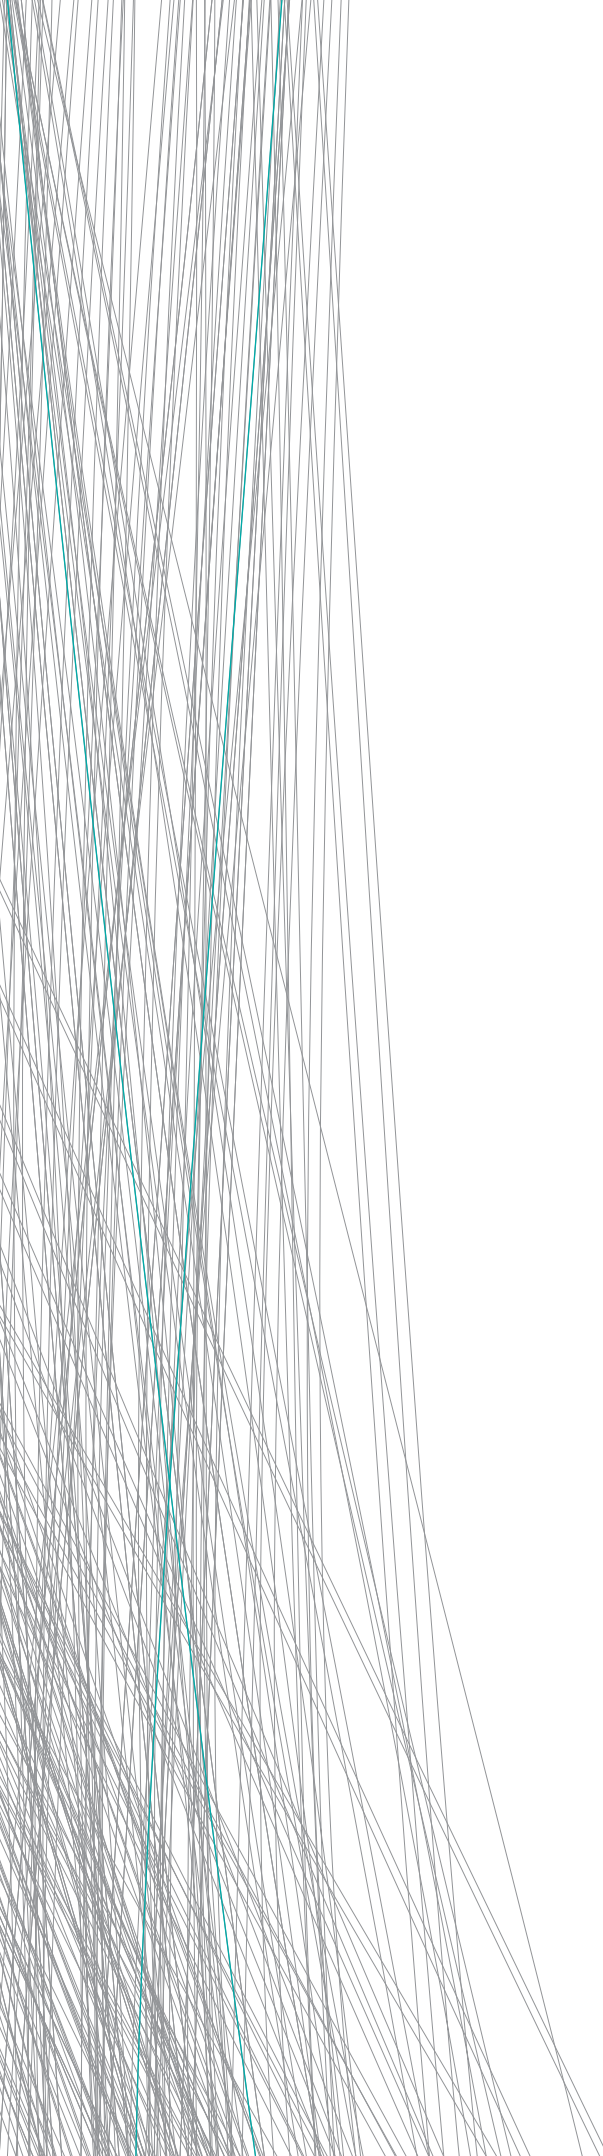

CityLink's PrivateLAN CityBRIDGE VLAN Ethernet service connects your offices in different cities with a Virtual Local Area Network (VLAN). Ethernet is ubiquitous in the office and now with CityBRIDGE the same familiar technology is used between cities to connect your offices. PrivateLAN connections offer the option of 25, 100 or 1000Mbps interface speeds and the CityBRIDGE bandwidth is scalable between 1-1000Mbps to meet your intercity needs.

### CityBRIDGE Features and Benefits:

- **Intercity Ethernet**  
The simplicity and high performance of an Ethernet VLAN are now available between cities with CityBRIDGE.
- **Benefits**  
CityBRIDGE provides all the benefits of PrivateLAN services, plus the ability to have scalable bandwidth to match your short and long term needs.

**About CityLink:**

CityLink has over a decade of experience in linking businesses.
